

Semester Program: **Statistics and Probability**

BSc Business Information Technology

Semester	SS 2026	Lecturer	Prof. Dr. Tobias Schoch (tobias.schoch@fhnw.ch)	Class	BIT FT2a
Campus	Basel		Zoom Meetings: https://fhnw.zoom.us/my/tobiasschoch	Special	[none]

Week	Date	Time	Place	Topic/Task
8	Tuesday, February 17, 2026	13:15 – 17:00	Room 1.12	Introduction; Unit 1: Data, Variables, and Measurement, Unit 2: Categorical Variables
9	Tuesday, February 24, 2026	13:15 – 17:00	[no lecture]	
10	Tuesday, March 3, 2026	13:15 – 17:00	Room 1.12	Unit 3: Quantitative Variables Unit 4: Relationships
11	Tuesday, March 10, 2026	13:15 – 17:00	Room 1.12	Unit 4: Relationships
12	Tuesday, March 17, 2026	13:15 – 17:00	Room 1.12	Unit 5: Introduction to Probability Theory Unit 6: Combinatorics (guided self-study)
13	Tuesday, March 24, 2026	13:15 – 17:00	Room 1.12	Unit 7: Multistage Random Experiments
14	Tuesday, March 31, 2026	13:15 – 17:00	[no lecture]	
15	Tuesday, April 7, 2026	13:15 – 17:00	Room 1.12	Unit 8: Conditional Probability Learning-points Exam (Unit 6: combinatorics)
16	Tuesday, April 14, 2026	13:15 – 17:00	Room 1.12	Unit 9: Random Variables

Week	Date	Time	Place	Topic/Task
17	Tuesday, April 21, 2026	13:15 – 17:00	Room 1.12	Unit 10: Discrete Distributions
18	Tuesday, April 28, 2026	13:15 – 17:00	Room 1.12	Unit 11: Continuous Distributions
19	Tuesday, May 5, 2026	13:15 – 17:00	Room 1.12	Unit 12: Inference for Proportions
20	Tuesday, May 12, 2026	13:15 – 17:00	[no lecture]	
21	Tuesday, May 19, 2026	13:15 – 17:00	Room 1.12	Unit 13: Inference for Means
22	Tuesday, May 26, 2026	13:15 – 17:00	Room 1.12	Unit 14: Comparing Means
23	Tuesday, June 2, 2026	13:15 – 17:00	[no lecture]	

Prep work

Students are expected to complete the prep(-ation) work completely and in time.

Guided self-study

The lecture gives a (very) brief introduction to combinatorics (Unit 6). Students are required to study the scan of book chapter on combinatorics (available on moodle, see Unit 6) and solve the problems in Problem Set 6 as a self-study task. Combinatorics questions will be on the final exam.

Module description

The semester program laid out here complements the regulations in the module description (<https://modulbeschreibungen.webapps.fhnw.ch/>). In the event of inconsistencies between the regulations in the two documents, the module description shall take precedence over the semester program.

Moodle (document repository)

Link: <https://moodle.fhnw.ch/course/view.php?id=67175> (enrollment key: ts87stat32)

Learning points

Students will be given the opportunity to earn a maximum of 9 learning points (or bonus points) during the semester. The learning points are added to the number of points obtained in the final module examination. Grading is based on the total of number of points (learning + exam point).

Students can earn learning points by taking a learning-points exam.

Information on final module examination

Written exam; duration: 90 minutes (max. 90 points); grading scale is based on bi-linear interpolation. Students can bring 1 A4 sheet (= 2 A4 pages; front and back) with notes and the pocket calculator TI-30X Pro MathPrint (or MultiView) to the exam. The notes can be written by hand or with the computer.

**Any changes to the program will be posted on our Moodle repository.
Please check our Moodle repository regularly!**
