

SYLLABUS-SYNC

You Will Never Miss Deadlines Anymore

Presentation by:

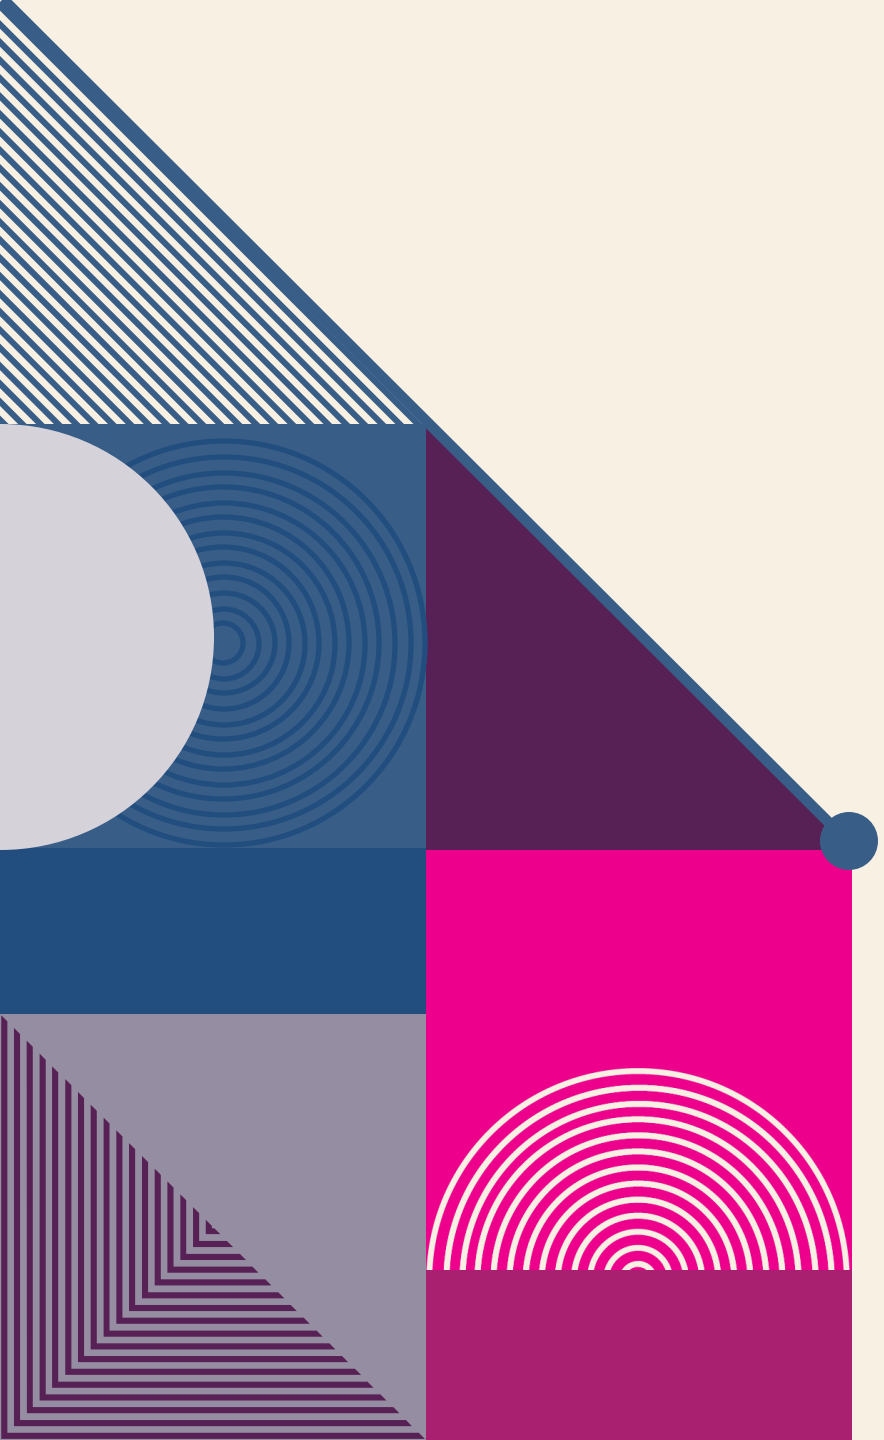

Anna Geiser

Antuan Asal

Haniye Rahmani

Jeremy Bobst

Prammiya Premathas

A decorative graphic on the left side of the slide, composed of several overlapping geometric shapes and patterns. It includes a dark blue triangle at the top left, a light blue circle, a dark blue square with concentric circles, a dark purple triangle, a bright pink square with a white semi-circular pattern, and a grey square with a dark purple triangle and concentric lines at the bottom left.

AGENDA

1- Executive Summary

2- Use Case

3- Business Value

4- Architecture Overview

5- Live Demo

6- Learnings

EXECUTIVE SUMMARY

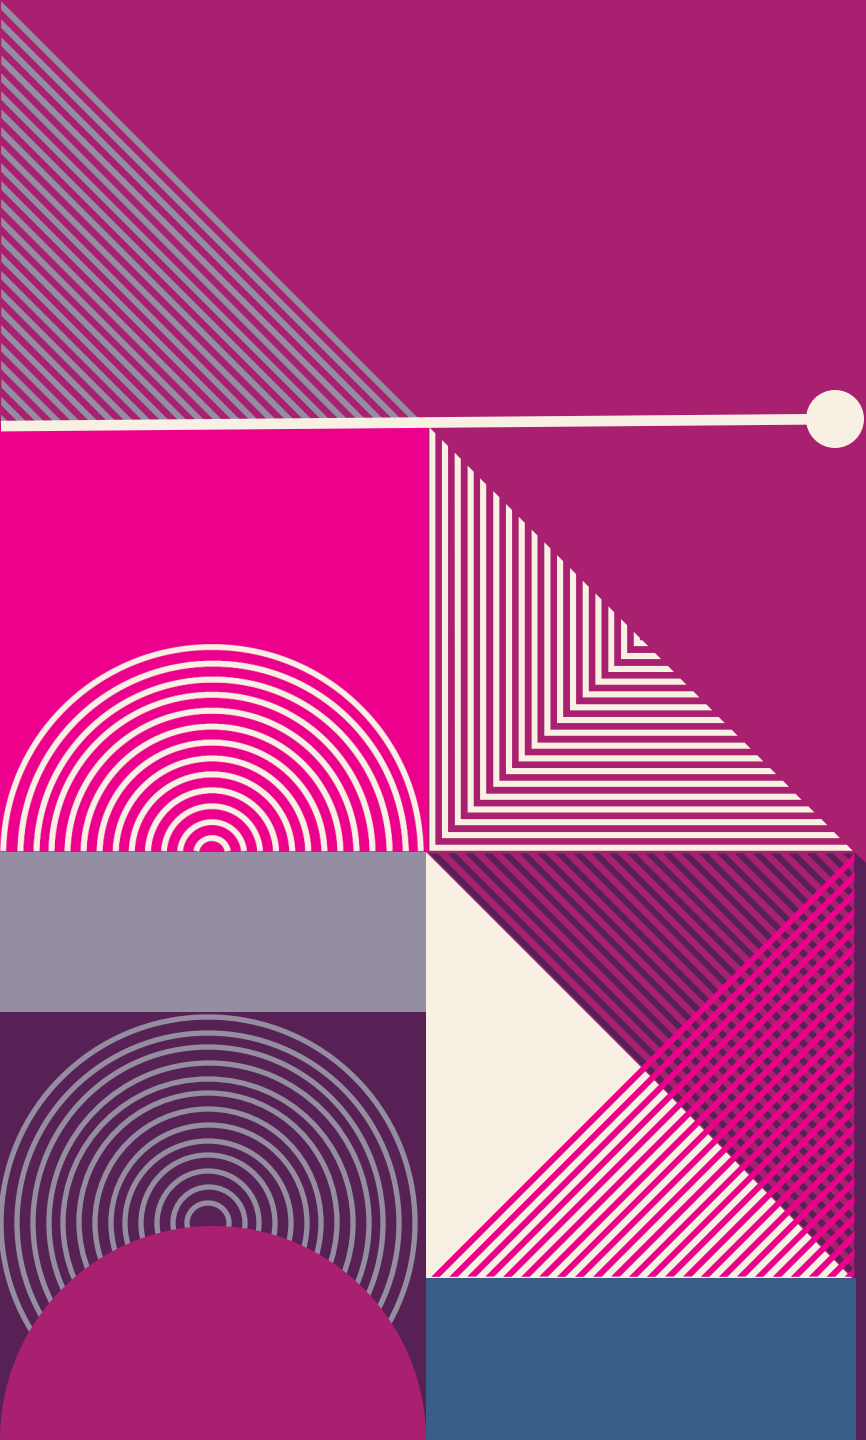

EXECUTIVE SUMMARY

PROBLEM

- Moodle deadlines are scattered across PDFs and pages
- Manual calendar entry causes errors and missed deadlines
- Students spend time searching instead of learning
- Approximately 50% of academic deadlines are not displayed in the Moodle calendar.

SOLUTION

- AI extracts deadlines and syncs them to the calendar automatically

USE CASE

AS-IS VS. TO-BE

FROM MANUAL CHAOS TO AUTOMATED FLOW

AS-IS

- Lecturer uploads PDF
- Student searches for deadlines
- Manual calendar entry
- High risk of errors

TO-BE

- ① Upload PDF
- ② AI extracts deadlines
- ③ User reviews results
- ④ One-click calendar import

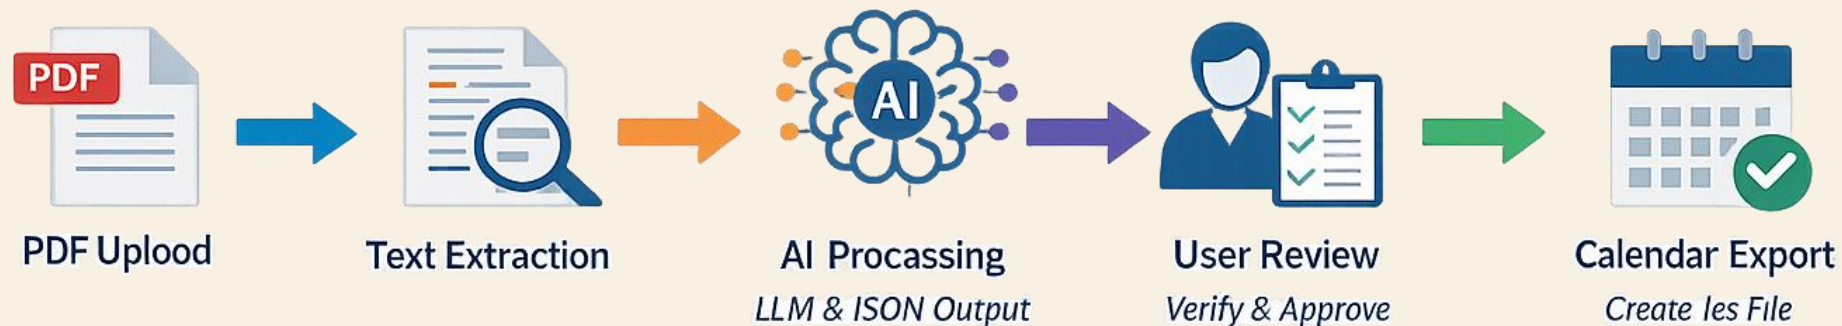

BUSINESS VALUE & IMPACT

- ✓ Saves ~30 minutes per student per week (assumption)
- ✓ Reduces missed submissions
- ✓ Improves study planning and reliability
- ✓ Scales across courses without extra admin effort

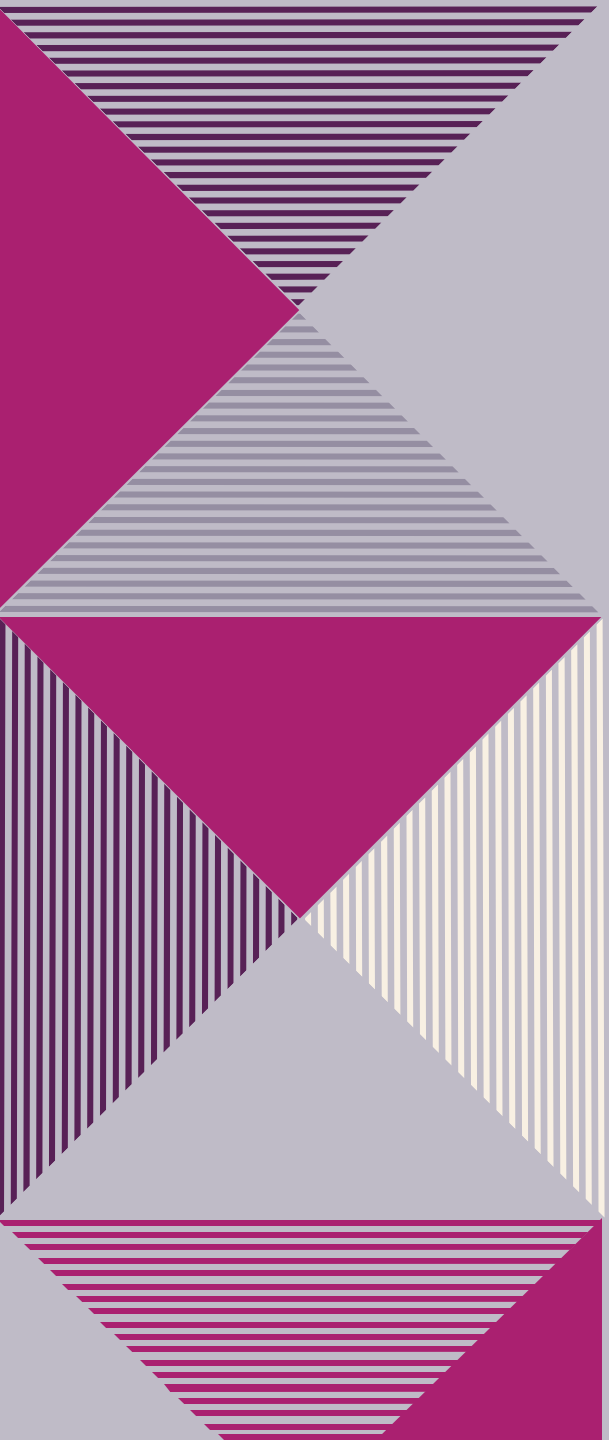

Low implementation effort
→ high recurring time savings

HIGH-LEVEL ARCHITECTURE

- PDF UPLOAD
- TEXT EXTRACTION
- LLM → STRUCTURED JSON
- USER REVIEW
- CALENDAR (.ICS) EXPORT

Automated Deadline Integration

LIVE DEMO

KEY LEARNINGS FROM BUILDING WITH GENERATIVE AI

- Structured prompting improves reliability
- Academic data is messy and inconsistent
- Human review reduces risk significantly
- Small prototypes create fast learning loops
- Antigravity accelerated experimentation and iteration

THANK YOU
